

# TOTAL-CENTURY DESIGN

*Mid-century double vanity. Walnut and Copper. Morganton, NC*

## From Craftsman to Modern...

From the Greene Brothers' timeless 1908 Gamble House to George Nakashima's forward-looking 1973 studio, AppWood is proud to introduce you to our "Total Century" furniture and cabinetry line.

Call it Mission or Stickley; the name varies but there is no mistaking the design. Our rich dark woods, distinctive door styles, and geometric elements harken back to the early 1900s, with an Arts and Crafts mentality of the craftsman who takes pride in every aspect of his work.

Fast forward and you will find our mid-century line of modern cabinets, embodying a sense of dramatic futurism, tempered by the pristine contours of sleek, sophisticated lines.

Our Total Century design promises you a seamless marriage between beauty and progress. A blend of the past with the future, in your present, offering a truly unique and hybrid take on all your woodworking needs.

*Nakashima-inspired credenza. Walnut. Chicago, IL.*

## AppWood Table

At the heart of any home there is a table. A table wears the signs of years of life and love in every society. Some days it plays host to homework, some days it's bills, and, every day, it's the place we gather with our friends, with our children, and with our colleagues to eat and chat and play. We're passionate about people slowing down, spending more quality time together, and building strong, lifelong bonds. Let AppWood Custom build you a unique and heirloom-quality table that will create memories for you and yours for generations to come.
